

Power Your Business with Local Energy

The Solar Landscape

At AllEarth Renewables, we believe that there are better, more responsible ways to power our lives, and that there's no better way for a Vermont business to stand out from the crowd than going solar. Not only is solar a great way to cut down on operating costs, it also helps your business do the right thing for the planet and position itself as an environmental leader. Whether you're purchasing the system and reaping the ROI or entering into a Power Purchase Agreement (PPA), solar will help you save money on your electric bills. It's also a great marketing tool that serves as an active reminder of your business's green values and commitment to a brighter future.

The AllEarth Advantage

AllEarth Solar Trackers are a natural fit for small commercial solar installations and have a proven track record of helping Vermont businesses reach their environmental goals and meet their bottom lines. You can feel good about this durable, reliable, Vermont-made product, which has an industry-leading 120 mph wind rating. AllEarth trackers produce up to 40% more energy than fixed mount systems, which means the best return on your solar investment! As the nation's leading solar tracker company, with over 7,000 solar installations across the country, AllEarth's industry experience and innovative product make going solar an easy decision.

Key Features

- Grid tied, 360° dual axis

Our Partnerships

AllEarth's extensive dealer network includes dealer-installer partners in over 30 states, meaning that no matter where you're located, we can help you find a trusted resource to get your solar journey started.

Yestermorrow Design/Build School

Location: Waitsfield, VT

Project Size: 28 kW

Annual Production: 36,000 kWh

Installer: AllEarth Renewables

Yestermorrow is the go-to place for green building and design, combining the best techniques and technologies of yesterday with the cutting-edge ideas of tomorrow. Their trackers help them meet their mission of sustainability by powering their campus with clean, local energy.

Snake Mountain Boatworks

Location: Weybridge, VT

Project Size: 12 kW

Annual Production: 24,000 kWh

Installer: AllEarth Renewables

Snake Mountain Boatworks is a small business focused on preserving, repairing and restoring antique wood boats. Their trackers produce 88% of their energy needs, providing a solution that's both sustainable and financially savvy (with a 5.2% return on their renewable investment).

Concept 2

Location: Morrisville, VT

Project Size: 39 kW

Annual Production: 54,600 kWh

Installer: AllEarth Renewables

Concept 2, the world leader in the design and manufacturing of rowing machines and racing oars, chose AllEarth Solar Trackers to get the most energy in a limited amount of available space. Their seven trackers cover 20% of the company's energy usage.

Vermont Smoke and Cure

Location: Hinesburg, VT

Project Size: 150 kW, 156 kW and 88kW

Annual Production: 610,000 kWh

Installer: AllEarth Renewables

Vermont Smoke & Cure, a 54 year old smokehouse, makes meat better for all. Getting their energy from solar is an important part of their mission as a certified B-corporation, and now more than 50% of their electricity is generated by AllEarth Solar Trackers across three different installations.
